

The Preparation of Illustrations for Reports of the United States Geological Survey; With Brief Descriptions of Processes of Reproduction (Paperback)

By John Livesy Ridgway

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 Excerpt: .useful for tracing faint lines on old and poorly preserved prints or drawings. Such a table has been installed in the section of illustrations, where it can be used by authors and others. TOPOGRAPHIC FEATURES. RELIEF. The effect of relief is expressed on a map by three methods--by contours, by hachures, and by shading. (See fig. 6.) The first method does not give pronounced pictorial expression of relief, though it gives correct shape and exact elevation; the others are more pictorial, but they do not give exact elevation. Contours.--As contoured maps are originally prepared from actual surveys the draftsman should simply follow the copy furnished by the topographer or such original matter as may be given to him for redrawing. If the area mapped is large and the contours are close together the original may be transferred by celluloid tracing (see p. 47), or it may...
