The lack of storage capacity in the existing sewage lagoon and seasonal limitations in the application of treated effluent to the spray field has reduced the original treatment capacity. Each of the four action alternatives would meet the purpose and need for improvements to the wastewater treatment plant and would have a design capacity of 250, 000 gpd, which is similar to the original design capacity of the existing operation. The key characteristics of each alternative are summarized in Table 1. Additional alternatives that were considered, but eliminated from detailed study for various reasons, are also briefly discussed. A discussion of the alternative selection process is included in Section 2. 7. Mitigation measures common to all alternatives are...
