THE CRYPTOCLUB: USING MATHEMATICS TO MAKE AND BREAK SECRET CODES

A K Peters/CRC Press, 2006. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: " The Cryptoclubpresents a number of different systems of encryption and methods of breaking them . Each type of cipher is presented in detail and exercises are included allowing students to apply the techniques presented. The Cryptoclubalso includes short descriptions of famous examples of secret codes, including the Beale Ciphers, the Zimmerman telegram, and the German Enigma cipher. The Cryptoclub is intended for middle-school students, and could be used for classroom teaching or as a supplemental or recreational book for students interested in cryptography. However, the potential appeal is much broader: the simplest ciphers could be solved by a child in grade school, and much of The Cryptoclubcan be enjoyed by adults as well. -Sarah Boslaugh, MAA Reviews, October 2006The Cryptoclubis more than just a "math book": a story line is woven around each type of code, making it more interesting for students. This book could serve as a resource for enrichment or gifted programs [and] could easily be incorporated into a cross-curricular thematic unit. -Judith Casey, NCTM, August 2007Mathematical material is brought to life with fictionalized stories about a group of SCryptokids as well as true stories from the history of cryptography. -Book News, December 2006A fine book that introduces middle school pupils to coding, a topic that surely would have immediate appeal for many of them.Despite its challenging mathematical content, there is nothing dry about this book. All the techniques employed for modern children "s books are used here to good effect: a story line to connect the topics, with coloured illustrations, boxes to set of examples and exercises, as well as a number of historical anecdotes set on special pages. -CMS Notes, March 2007The Cryptoclub is very clearly...
