Reviews

These sorts of book is the perfect book accessible. It is amongst the most amazing book i have got read. I found out this ebook from my i and dad advised this book to find out.

(Mr. Mustafa Sanford IV)

CHEMICAL LECTURE EXPERIMENTS: NON-METALLIC ELEMENTS (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Chemical Lecture Experiments: Non-Metallic Elements The object of this book is twofold. Firstly, it is intended to supply chemical lecturers and teachers with a useful repertoire of experiments, suitable for illustrating upon the lecture table the modes of preparation, and the properties, of the non-metallic elements and their commoner and more important compounds. I have therefore given such full directions for the preparation and performance of the various experiments described, as will enable any experimenter to successfully repeat them. No mere description of experiments, however minute, can entirely take the place of experience, but it has been my endeavour throughout this book to give such details, resulting from my own experience, as shall meet as far as possible the lack of experience in others. No account of any experiment has been introduced into the book upon the authority solely of any verbal or printed description, but every experiment has been the subject of my personal investigation, and illustrated in every case, with the exception of three, by woodcuts made from original drawings. What should be and what should not be included under the head of experiments suitable for illustration upon the lecture table may be a matter for difference of opinion, and must depend often upon circumstances. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
